

Internship – AI/ML/DS Developer

About OpenText:

OpenText enables the digital world as the global leader in Enterprise Information Management, both on premises and in the cloud. We are committed to being the best place to work for more than 22,000 employees across the world. What we do, we do well. What we create, we do purposefully to impact the world. If you believe in this and are passionate about directing people towards a better way to work, then let OpenText enable your digital world career. Our business requires top talent. We foster a thriving, dynamic environment rich with inventive minds and entrepreneurial spirit. From engineering to sales and marketing, operations and customer support, our employees are empowered and encouraged to build their careers at OpenText. We pride ourselves on hiring standout candidates who shine in a workplace that encourages collaboration and teamwork.

About the opportunity:

Are you passionate about Artificial Intelligence, Machine Learning, Data Science, and Generative AI? Join OpenText's AI Engineering Internship Program and gain hands-on experience working on real-world projects that transform how enterprises manage, search, understand, and utilize information. As an intern, you will collaborate with experienced engineers and AI specialists, contribute to innovative solutions, and build skills that prepare you for a successful technology career.

Your Impact:

- Assist in developing and testing Machine Learning models for document classification, metadata tagging, and intelligent search while working with data preparation, feature engineering, model training, and evaluation.
- Work with structured and unstructured data to develop AI-driven solutions.
- Gain hands-on experience applying basic AI/ML concepts and contribute to real-world AI, ML, and Data Science projects across various business functions.
- Support the integration of NLP and machine learning models into enterprise content management systems.
- Design and experiment with AI-powered workflows and automation solutions.
- Develop software components, APIs, and tools that support enterprise-scale applications.
- Design, build, and orchestrate multi-agent workflows using Agentic AI frameworks.
- Contribute to the development of internal tools and automation scripts to streamline workflows.
- Collaborate with cross-functional teams in an agile and innovative environment.
- Learn industry best practices in software engineering, AI development, and cloud technologies.

What you are great at:

- Bachelor's degree in Computers Science Engineering, Electronics and Communication Engineering & related disciplines with Artificial Intelligence, Data Science & Machine Learning
- Strong programming fundamentals and problem-solving skills. Proficiency in Python, Java or C++ and familiarity with AI/ML libraries
- Exposure to Natural Language Processing (NLP) concepts and techniques
- Proficient in JavaScript, Angular, REST
- Basic understanding of Agentic AI frameworks, development and deployment of agents, prompt engineering, and LLMs
- Excellent debugging skills
- Interest in working with unstructured data such as documents, emails, and PDFs
- Familiar with databases (like MySQL, Oracle, PL/SQL etc.) and data visualizations tools
- Strong analytical and problem-solving mindset with attention to detail
- Stay up to date with AI trends, tools, and best practices relevant to information management
- Strong communication, collaboration, and learning agility

Nice to Have:

- Internship or academic project experience in AI, ML, or Data Science.
- Familiarity with cloud platforms (AWS, Azure, or GCP).
- Exposure to REST APIs or web development.
- Knowledge of information management systems or digital libraries.

Why Join OpenText:

- Work on cutting-edge AI and Generative AI technologies.
- Mentorship and training from experienced engineers, architects, and AI practitioners.
- Hands-on experience with real-world AI applications / enterprise-scale products in enterprise environments.
- A collaborative and inclusive team culture.
- Build skills that accelerate your professional growth. Opportunity to be considered for full-time roles based on performance & requirement.
- Bring your curiosity. Build innovative solutions. Shape the future with AI at OpenText.

OpenText is an equal opportunity employer that hires and attracts talent regardless of race, religious creed, color, national origin, ancestry, physical disability, mental disability, medical condition, marital status, sex, age, veteran status, or sexual orientation. At OpenText we acknowledge, value and respect diversity. We draw on diversity of thought and experience to reflect the rich array of cultures representing our broad global customer base.
